xdisturb (x-disrupt) — Intelligent Location-Based Ringer Controller

App Version: 0.1.1 (Release)
Target OS: Android (8.0+) & iOS (13.0+)
Document Type: Official User Guide & Manual
Language: English
Support Email: support@xdisturb.et
Support Website: https://xdisturb.et
Date: August 10, 2026
Document Status: Official Release

1. Welcome to xdisturb!

Welcome to **xdisturb (x-disrupt)** — your intelligent, location-aware mobile assistant designed to automatically manage your smartphone's sound profiles based on your physical surroundings.

Whether you are attending daily prayers at a 🕌 **Mosque**, worshipping at a 🏛️ **Church**, studying in a quiet 📖 **Library**, or entering your workplace office 📍, **xdisturb** automatically switches your device to **Silent** or **Vibrate** mode upon arrival and seamlessly restores your normal volume when you leave!

2. Quick Start Setup Checklist (5-Minute Initial Setup)

To ensure **xdisturb** operates reliably in the background without being silenced by your smartphone's operating system, follow this 5-step initial setup checklist:

Setup Steps

1. Install & Launch:

- Download and install **xdisturb** from the Google Play Store or Apple App Store. Tap the icon on your Home Screen to launch.

2. Grant Location Permission ("Allow all the time"):

- When prompted, select "**Allow all the time**" (Android) or "**Always**" (iOS). This enables background geofencing so the app can detect when you enter a Silent Zone even when your screen is locked.

3. Grant Do Not Disturb (DND) Access:

- Tap "**Grant DND Access**" when requested. The system will open your device's Notification Access settings. Toggle **xdisturb** to **ON** to allow the app to adjust ringer modes automatically.

4. Configure Auto-Start & Battery Saver (Android Devices):

- Enable **Auto-Start** and set Battery Saver settings to "**No Restrictions**" to prevent the OS from terminating background location monitoring. (See Section 4 for vendor-specific guides).

5. Phone Number OTP Registration:

- Enter your mobile phone number (e.g., +251911223344) and type the 6-digit SMS verification code to activate your account.

3. Using Core Features

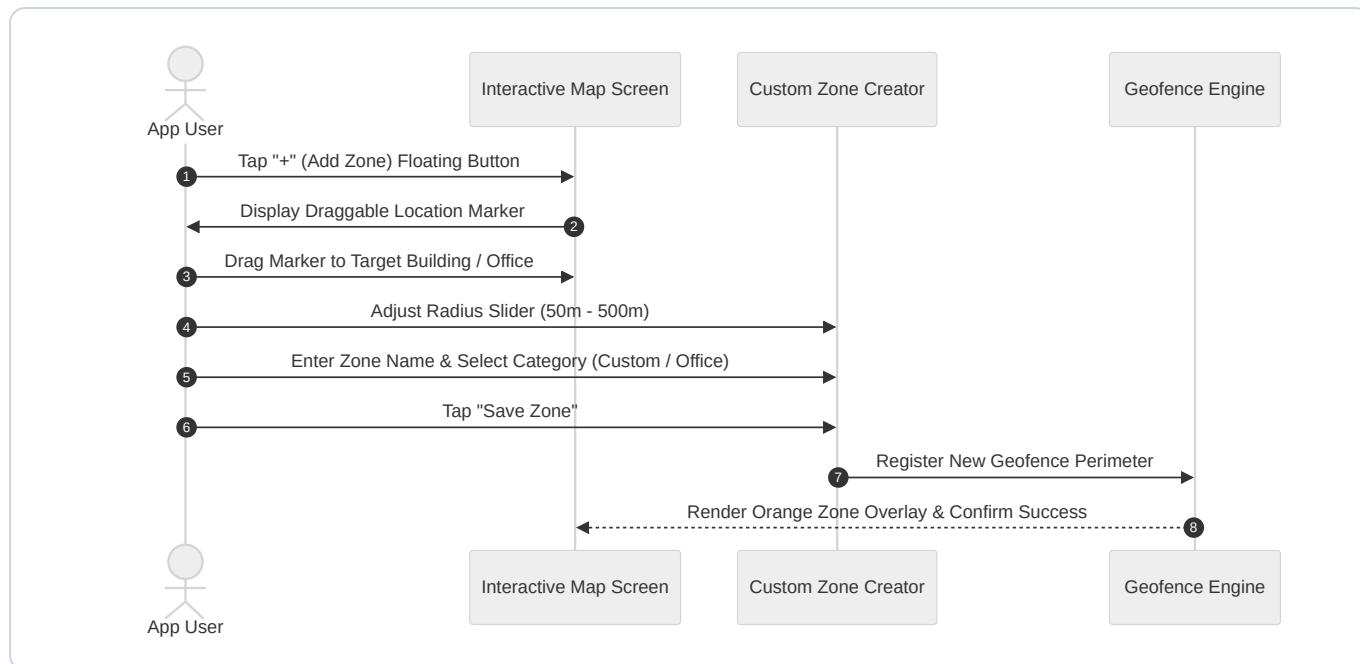

3.1 Interactive Map & Silent Zone Explorer

The **Map Screen** is your primary dashboard for discovering and managing Silent Zones around you.

- **Map Navigation:** Pinch to zoom and drag to explore nearby quiet locations.
- **Color-Coded Zone Categories:**
 -  **Mosques:** Marked in **Green**
 -  **Churches:** Marked in **Blue**
 -  **Libraries:** Marked in **Yellow**
 -  **Custom Zones:** Marked in **Orange**
- **Zone Details Card:** Tap any icon on the map to view the zone name, physical address, distance from your current position, and active radial coverage.

3.2 Creating a Custom Silent Zone

You can easily create your own custom Silent Zones for workplaces, study spaces, or private locations.

Step-by-Step Instructions:

1. Tap the **"+" (Add Zone)** button located on the bottom right of the Map screen.
2. Drag the pin marker directly over your desired building or perimeter.
3. Use the **Radius Slider** to set the detection area from **50 meters** (tight building boundary) up to **500 meters** (large campus area).
4. Enter a descriptive **Zone Name** (e.g., *"HQ Meeting Room"* or *"University Campus"*).
5. Tap **Save Zone**. The custom zone will instantly appear on your map and begin monitoring.

3.3 In-App Subscriptions & Premium Upgrades

Free users can configure up to 3 custom Silent Zones. Upgrading to **xdisturb Premium** unlocks unlimited custom zones, custom time schedulers, and priority support.

How to Subscribe via Chapa Payment Gateway:

1. Open the side menu and select **Subscription & Premium**.
2. Select your preferred subscription plan (Monthly or Annual).
3. Tap **Pay with Chapa**.
4. Choose your payment method:
 - **Telebirr**
 - **CBE Birr**
 - **Bank Cards (Visa / Mastercard)**
5. Complete the payment authentication. Premium capabilities are unlocked instantly upon confirmation.

4. Troubleshooting Background Execution

Issue: *"My phone is not switching to Silent mode automatically"*

Smartphone manufacturers implement aggressive battery-saving features that can freeze background apps. If **xdisturb** does not switch modes automatically, configure your device settings according to your phone manufacturer below:

Xiaomi / Redmi / POCO (MIUI / HyperOS)

1. Open **Settings > Apps > Manage Apps > xdisturb**.
2. Toggle **Autostart** to **ON**.
3. Tap **Battery Saver** and change the setting to **No Restrictions**.
4. Open **Security App > Permissions > Autostart** and verify **xdisturb** is enabled.

Samsung Galaxy (One UI)

1. Open **Settings > Battery and Device Care > Battery**.
2. Tap **Background Usage Limits**.
3. Tap **Never Sleeping Apps > Tap "+" > Select xdisturb** and tap **Add**.
4. Go to **Settings > Apps > xdisturb > Battery > Select Unrestricted**.

Transsion Devices (TECNO / Infinix / itel - HiOS / XOS)

1. Open **Settings > App Management > App Auto-start Management**.
2. Enable **xdisturb**.
3. Go to **Phone Master Manager > Power Management > Disable restrictions for xdisturb**.

Apple iPhone (iOS)

1. Open **Settings > xdisturb**.
2. Verify **Location** is set to **Always**.
3. Verify **Background App Refresh** is toggled **ON**.

5. Privacy, Security & Customer Support

Privacy & Battery Guarantee

- **On-Device Geofence Processing:** **xdisturb** processes location events entirely on your mobile device. Your real-time location history is never sent to or stored on external cloud servers.
- **Ultra-Low Battery Consumption:** Using hardware-accelerated geofencing, **xdisturb** consumes less than **3% to 5%** of daily battery power.

Contact Support

If you need assistance or have feature suggestions, our dedicated team is here to help:

- **Support Email:** support@xdisturb.et
- **Official Website:** <https://xdisturb.et>
- **In-App Help:** Open Menu > **Help & Support > Submit Feedback**

Thank you for choosing xdisturb! Enjoy peace of mind and quiet moments without ever worrying about embarrassing ringer interruptions again.
